Arthur GOSSUIN

Principal Software Engineer | Brussels, Belgium

arthur.gossuin@gmail.com linkedin.com/in/arthurgossuin-848273105 github.com/Artygo8

ABOUT

I'd rather solve the real problem than hardcode around it. I go back to first principles, target the bottleneck, and make the system simpler. Software generalist with a scientific background, looking for a hard problem worth owning, ideally in a founding or high-autonomy role.

EXPERIENCES

Principal Software Engineer at Zensor **Jun 2023 - Today**

Generalist systems engineer, from edge hardware to cloud and internal tooling. Main focus: simplifying code and workflows.

- Simplified code and workflows until a team of 2 analysts, 1 DevOps (partly doing analysis) and me became **me, a full-time DevOps and 1 software engineer**, in under 2 years, delivering more than before
- That freed time to move the company from custom projects to building **one standard product**; led the consolidation of fragmented codebases into one platform
- Internal tooling: Python library for data analysts, automated data-backfill engine, Streamlit portal for non-technical users
- Hardware and edge: C logger for RevPi and Beckhoff I/O couplers; compression of 4G edge-to-cloud (AWS S3) transfers; Python memory optimisation
- Supervised 2 junior developers

Software Developer at Odoo **Apr 2021 - Jun 2023**

- Sole author of the first Odoo **Peppol** connector, in Python
- Owned the delivery carrier integrations: DHL, UPS, FedEx, EasyPost
- Co-maintained the OCR / machine-learning services
- Started in customer support engineering: first-hand view of real user problems

STUDIES

Software Engineer | s19 network 42 **2019 - 2021**

BA Geology Sciences | Université libre de Bruxelles **2015 - 2018**

PROJECTS & ACHIEVEMENTS

Semi-finalist (5 times) in the **Belgian Mathematical Olympiad** **High school**

Top 0.2% on the CodinGame platform | Profile `Artygo8` **2020**

Finalist in Belgian Cybersecurity Challenge | Team `19l33t` *Crypto* **2022**

timogen.be (discontinued) | Website lightening the paperwork of healthcare professionals *Vue.js, Django* **2022**

PROGRAMMING SKILLS

Proficient	Python, C, C++, Shell, Django, Linux, GitHub, AWS (S3), Streamlit
Experiences with	Industrial I/O, data pipelines, Machine Learning, Algorithms, Docker, Kubernetes, SQL, Flask, Vue.js, Elm, JS, Selenium, Ruby, Assembly, CSS, HTML, PHP
